

GE Medical Systems

DICOM General Perspectives

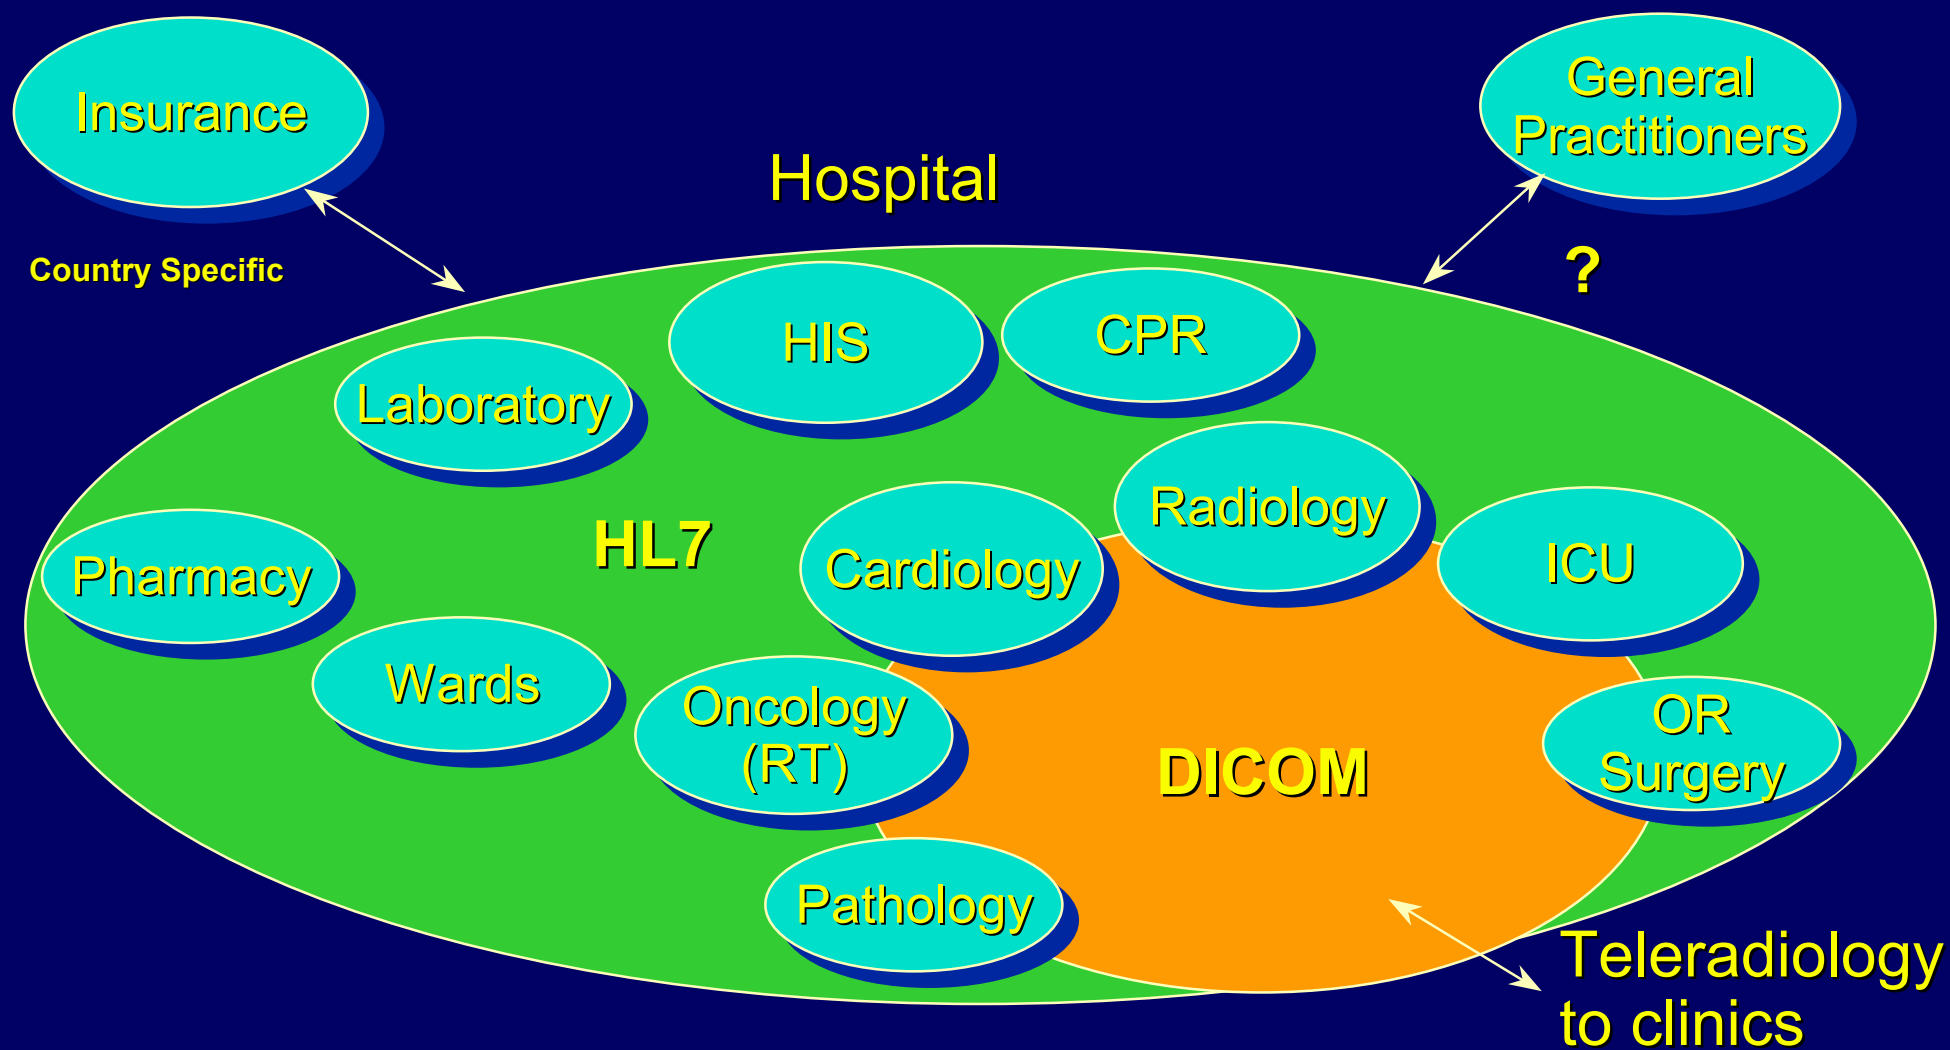

Charles Parisot, GE Medical Systems

SSRPM Course – Neuchâtel – June 2003

4 DICOM Service Classes for Integration

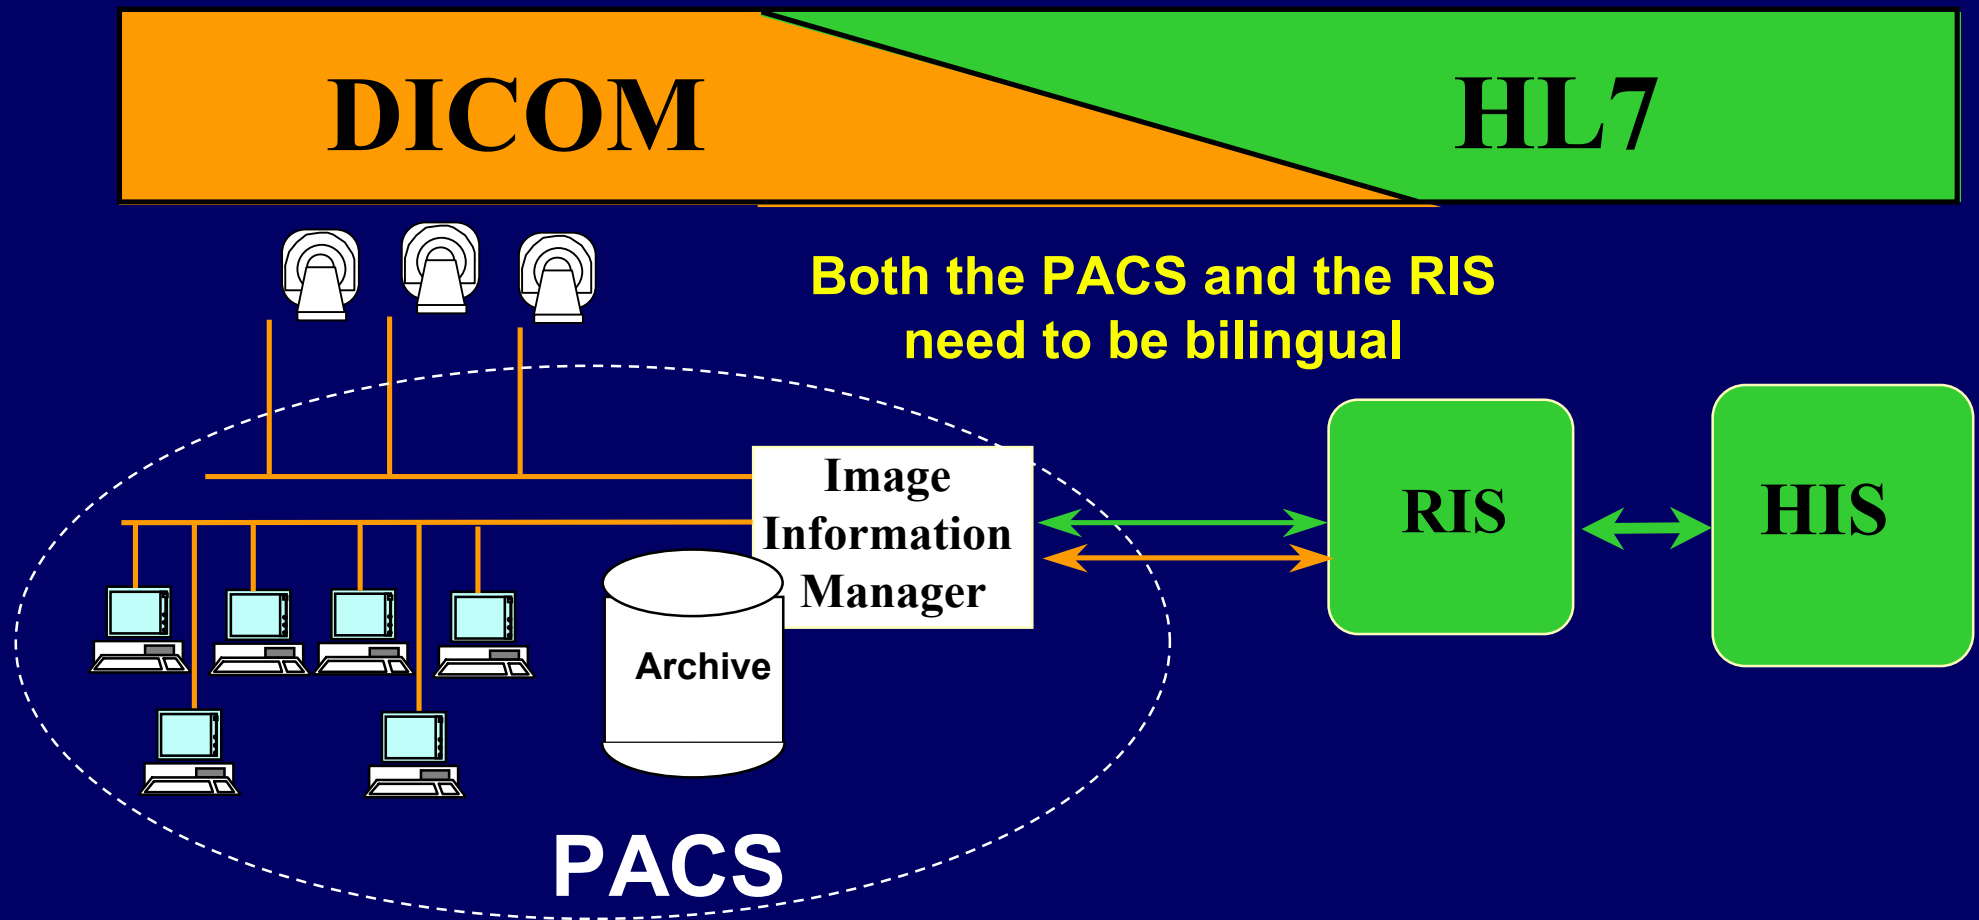

Healthcare Communication Standards

HL7 and DICOM are not competing standards

- **DICOM is focused at “diagnostics” and “processable” imaging:**
 - within Imaging Acquisition Departments (Radiology, Cardiology, Oncology, etc.)
 - between those and Image Processing Departments (neurology, oncology, etc.)
 - The Clinical Patient Record will contain/reference DICOM images (diagnostics level)
- **HL7 is focused at “textual” structured information exchange within the hospital integrating its various Departments. It is increasingly used in Europe.**
- **HL7 and DICOM can co-exist and the cooperation between the two standard bodies is high to facilitate joint usage.**

Standards Domain of Application

Integration of PACS and HIS/RIS

- RSNA, HIMSS, SFR, DRG, GMSIH work with a group of leading HIS, RIS, PACS and Modality Vendors to support a joint Initiative called IHE.
- Integrating the Healthcare Enterprise has specified standards-based integration profiles, now supported in products.
- IHE is not a new standard. Its technical framework integrates standard DICOM and HL7 “transactions” across modalities, PACS, RIS and HIS:
www.rsna.org/IHE www.ihe-europe.org
- IHE is now in full swing in Europe:
 - Many Sessions at ECR 2001-2002-2003.
 - IHE France by French Radiology Association and HIS Modernization Group. Demo at JFR 2001, Hosptial Expo 2002
 - IHE Deutschland, Demo at DRK 2002-2003. IHE in Italy too.

12a

IHE Workflow Events

www.rsna.org/ihe

Initial capture of patient demographic information

Registration

Goal:
Accurate, complete report accessible whenever the referring physician desires

Radiology report stored for network access

Report Repository

Diagnostic image and demographic info presented to radiologist

Diagnostic Workstation

Film Lightbox

HIS

patient information

Referring physician orders the desired radiology procedure

Orders Placed

Radiology report viewed by referring physician

PACS

Diagnostic image and demographic info stored for network access

Image Manager and Archive

Film Folder

examination orders

Orders Filled

Break down the entered order into specific radiology procedure steps to be performed

procedure scheduled

Prefetch any relevant prior studies

modality worklist

Patient and procedure information retrieved by the modality

acquisition completed

Position patient and acquire image

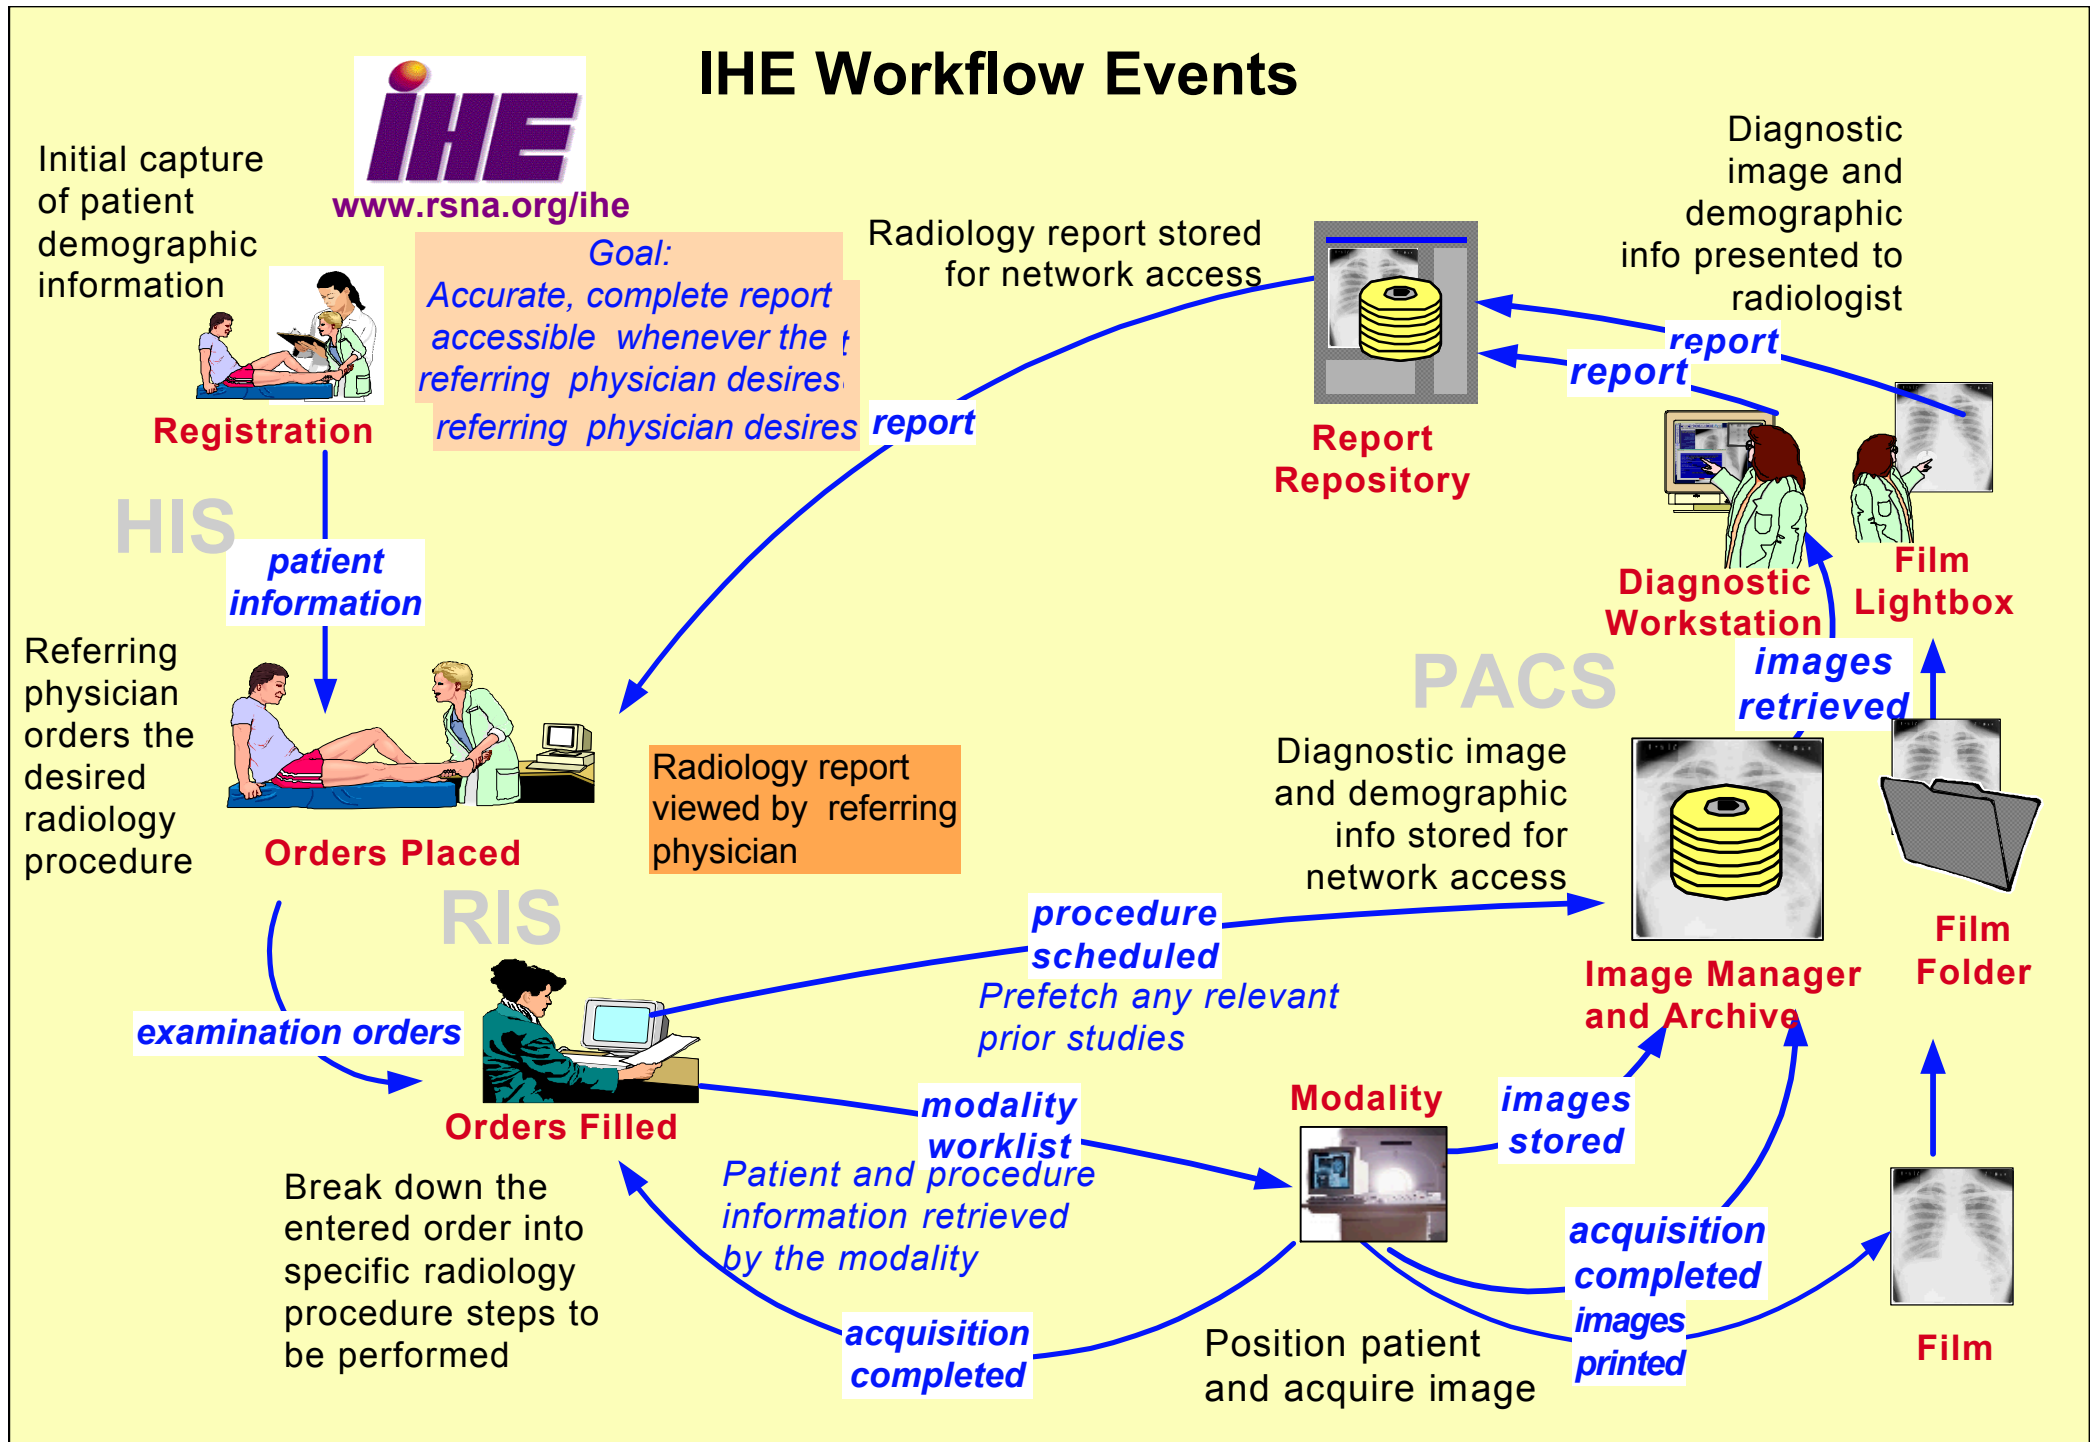

images stored

acquisition completed
images printed

Film

IHE has broad vendor support

At the IHE Europe Connectathon:

13 Vendors - 20 Systems in 2001

33 Vendors - 60 Systems in 2002

47 Vendors - 85 Systems in 2003

Among these are (US & Europe) :

ADAC/Cerner, Agfa, AIS, Algotec, ALI/McKesson, Analogic, Applicare/GE, ATL, Aycan, Canon, Cedara, Convergence, Convis, Eastman Kodak, eBIT, EDL, Elfin, Emageon, Engisan, Esaote, Ferrania, Fuji Medical Systems, GAP, GE Medical Systems, GMD, GWI, Hologic-Direct Radiography, IASI, ICSF, IDX, Inovit, Instrumentarium, Image Devices, IMCO, Kodak, Konica, Marconi, Medasys, Medavis, Med2rad, Medigration, Medimon, Medos, Merge, Metafora, Minolta, Mitra, Philips, RASNA Imaging, Raynux, Raypacs, RIS Logic, Sectra, Siemens, Softmedical, SOL, Stentor, StorCOMM, Swissray, Toshiba, TSI, Tiani Medgraph, Vital Images, Waid, XRP.

IHE 7000 visitors at RSNA and HIMSS

**Live Integration of
66 HIS, RIS, PACS, and
Modalities from 32
vendors !**

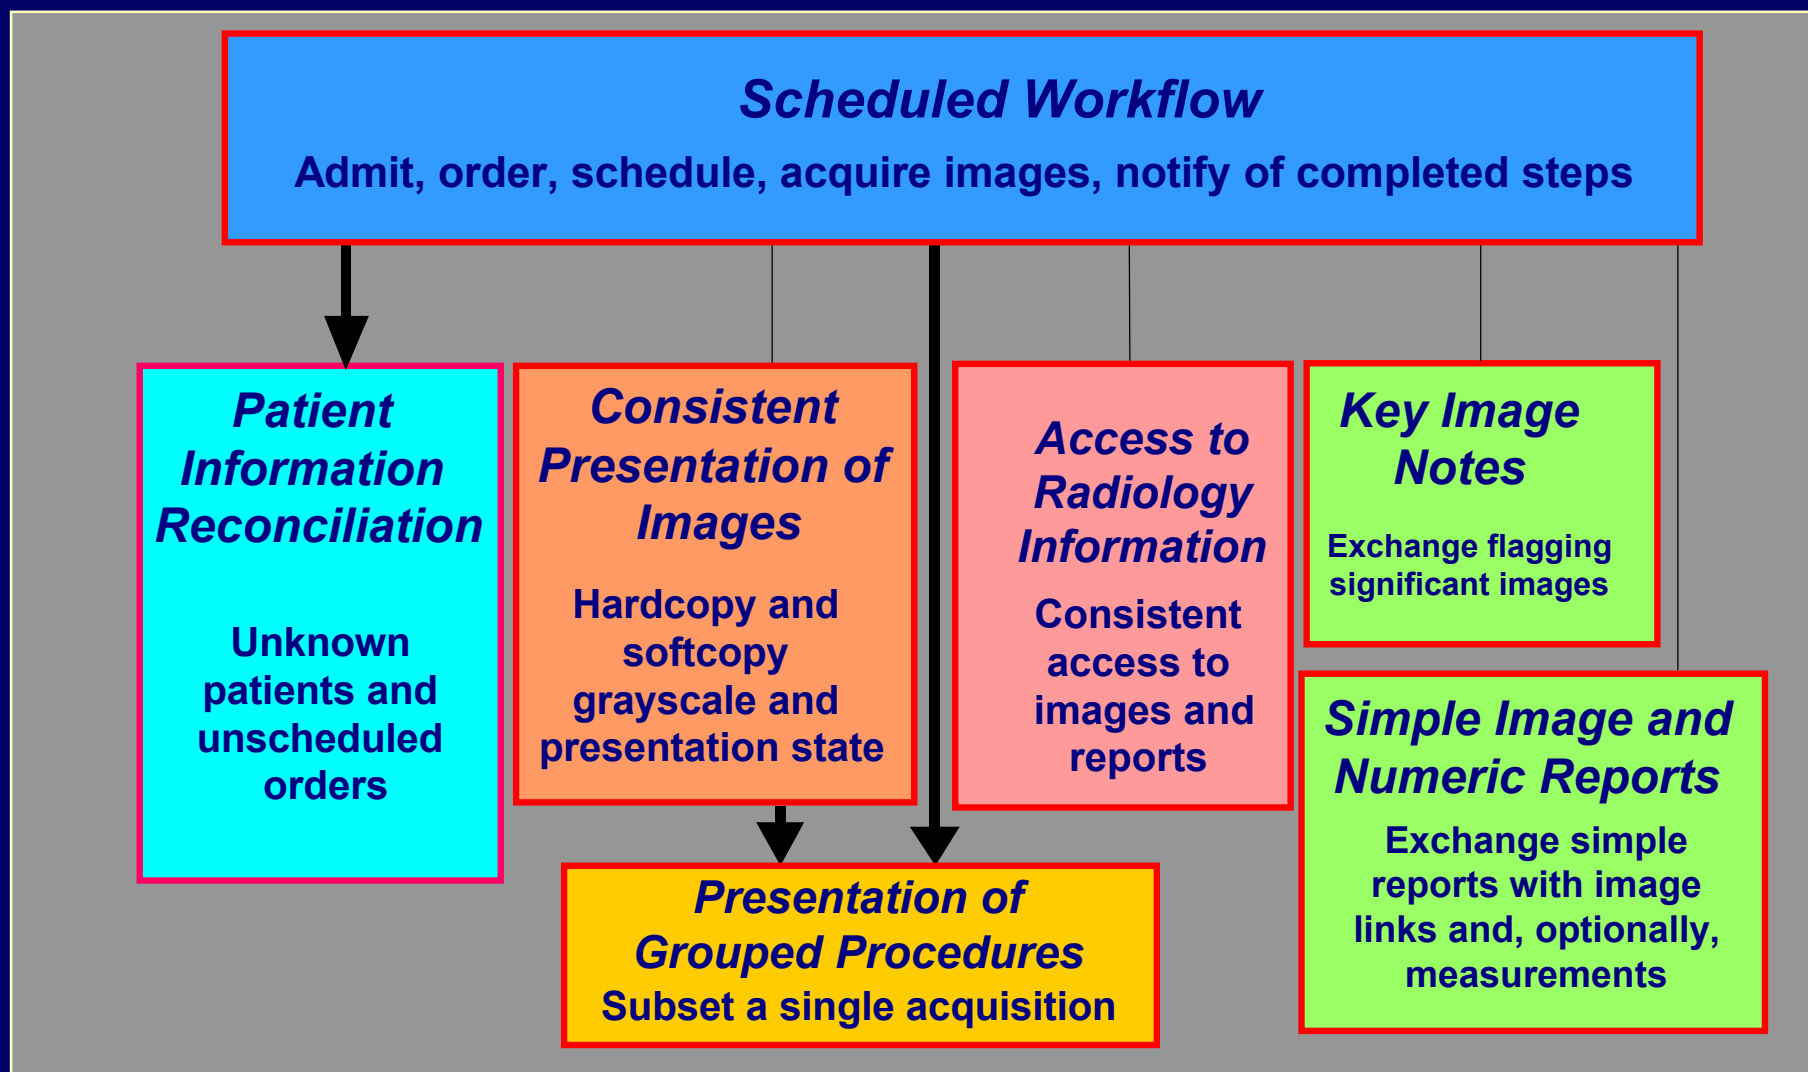

**Integrated Workflow
from Patient
Admission to
Imaging Scheduling
and Acquisition
Complete**

The IHE Integration Profiles

IHE Integration Profiles : The language of integration

A Sample IHE Integration Statement

IHE Integration Statement

Vendor	Product Name	Version	Date
GE Medical Systems	Centricity PACS	V1.0	12 Oct 2002
Integration Profiles Implemented	Actors Implemented	Options Implemented	
Scheduled Workflow	Image Manager/Archive	none	
	Image Display	none	
Patient Information Reconciliation	Image Manager/Archive	none	
Link to vendor IHE page		ge.com/ihe	
Links to Standards Conformance Statements of the Implementation

DICOM	ge.com/dicom/Centricity1.0.pdf		

IHE in Radiation Therapy ?

- 1. A good standards base needs to be available. Data Objects are solid, workflow needs work (reuse MWL/PPS ?)**
- 2. Professional Societies need to be ready to shape common workflows, expand resources and gather industry support. Physicist & Oncologists ?**
- 3. Effort should leverage radiology's experience. Infrastructure in place in the USA and in Europe.**
- 4. For market credibility, it should involve several countries. Links between US & Europe ?**

Needs to be user-driven & vendor-supported

Thank You !
